

Landscape	Landscape embodies the relationship between people and place. It is the character of an area, how the area is experienced and perceived, and the meanings associated with it.
Landscape character	Each landscape's distinctive combination of physical, associative, and perceptual attributes.
Landscape attributes	Characteristics and qualities (tangible and intangible) that contribute collectively to landscape character.
Landscape values	The reasons a landscape is valued. Values are embodied in certain attributes.
Landscape effect	An adverse or positive outcome for a landscape value as a consequence of changes to a landscape's physical attributes.
Landscape character area	A specific area with a common landscape character.
Landscape character type	A kind or class of landscape sharing certain generic characteristics.
Natural	Those elements that are of natural origin (landform, vegetation, water bodies) rather than human origin (buildings, infrastructure). Natural landscapes are those characterised more by natural than built elements.
Naturalness	The extent to which natural elements, patterns, and processes occur. The extent to which an area is unmodified.
Natural character	An area's distinct combination of natural characteristics and qualities, including degree of naturalness.
Outstanding natural features and landscapes	Natural features and natural landscapes of outstanding value in a district or region in terms of their physical, associative, and/or perceptual attributes.
